## UNIVERSAL HYDRAULIC PLATFORM TYPE 00420

N.U.C. 1730-15-120.3821

### TECHNICAL DESCRIPTION

The universal hydraulic platform was designed to carry out maintenance works from main rotor to tail rotor of different helicopter types.

This platform was built taking into account all recommendations provided by qualified helicopter maintenance personnel.

The main features of this platform are the following:

1. compact overall dimensions
2. easy to drive thanks to 4 rotating wheels
3. quick to install
4. safe and stable during use
5. height-adjustable working table as an option
6. adjustable access stairs
7. in compliance with all valid safety regulations

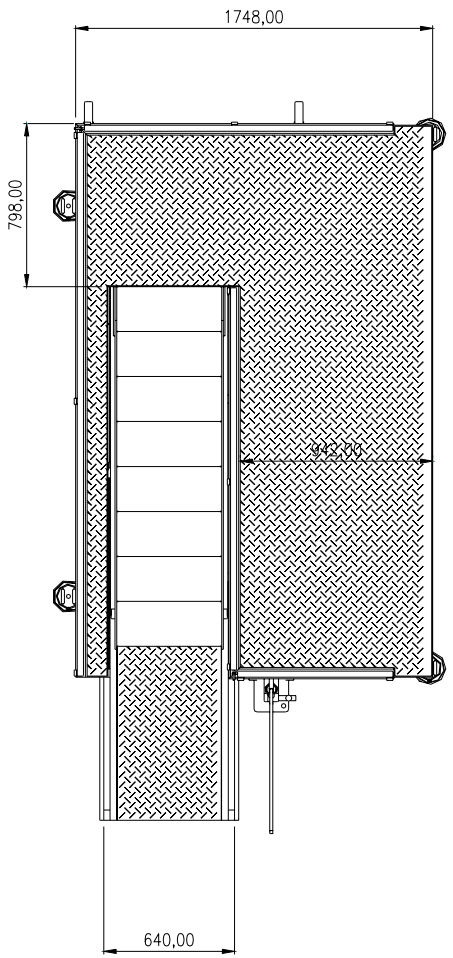

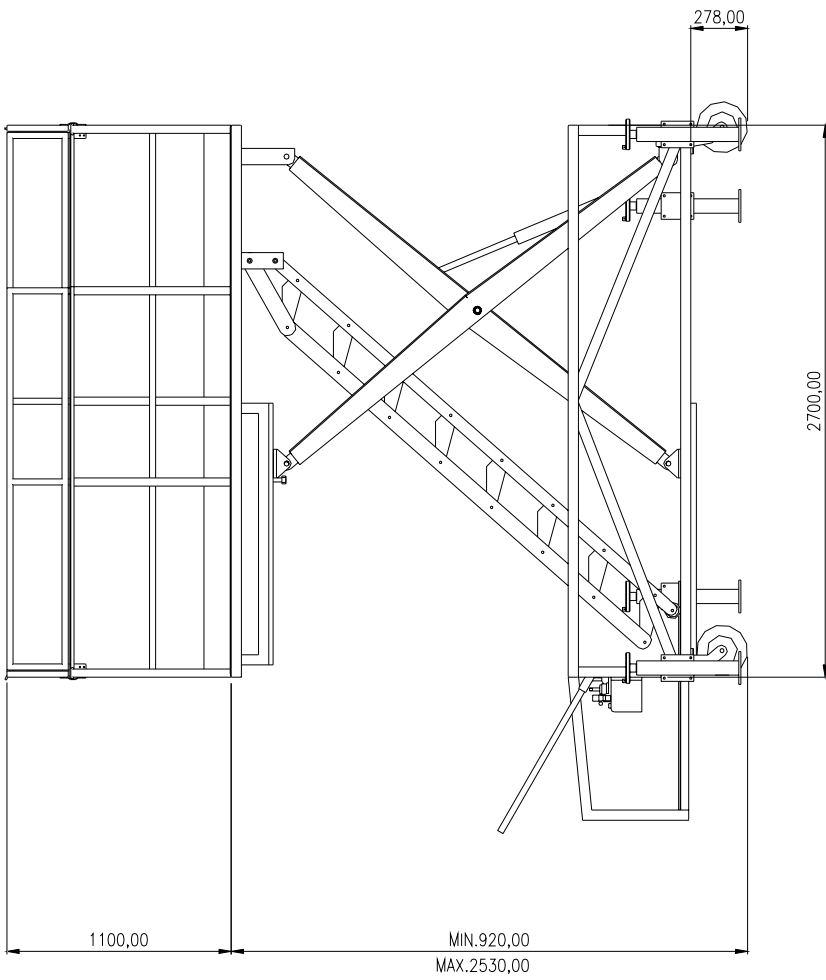

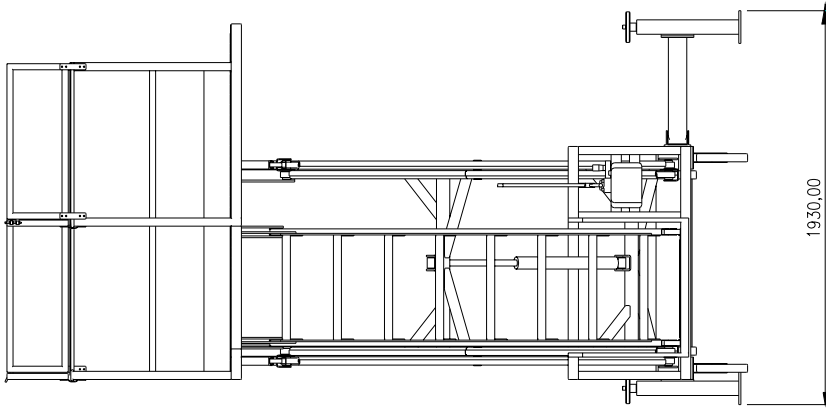

This universal platform is strong, sound, practical and well-proven, and meets maintenance requirements.

The platform dimensions are the following:

Total length of standing surface	2700 mm
Total width	1740 mm
Minimum floor height of standing surface	920 mm
Max. floor height of standing surface	2500 mm

The universal platform is supplied with the following documentation:

- use and maintenance handbook –EC compliant –
- acceptance handbook for safety regulation
